PROFESSIONAL SUMMARY

Software Developer with 8+ years of experience in game development, application maintenance, API integration, and web development. Experienced with JavaScript, TypeScript, Python, Lua, and Erlang, with additional exposure to C# and ASP.NET Core MVC through third-party API integration and Swagger/OpenAPI documentation. Experienced in developing game features, troubleshooting issues, supporting application releases, and building automation tools.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Lua, Erlang, Java, C# (API integration exposure), Visual Basic .NET
Web Technologies: React.js, Node.js, HTML5, CSS, ES6, Bootstrap
Game Development: Cocos Creator 2.4.12, Cocos Creator 3.8.7, Cocos2d-x, Roblox Studio
APIs and Backend: REST API integration, third-party API integration, C# / ASP.NET Core MVC API integration, Swagger/OpenAPI documentation, endpoint testing and validation, Postman, Discord Webhooks, OpenAI API integration
AI and Automation: Cursor AI-assisted development, Python automation, Discord bot with ChatGPT/OpenAI API-based conversational feature
Databases and Tools: MongoDB, MySQL, SQL Server Management tools, Navicat Premium, Redis Desktop Manager
Version Control and Development Tools: GitLab, GitHub, SourceTree, TortoiseSVN, Android Studio, PowerShell, SecureCRT, PhpStorm

PROFESSIONAL EXPERIENCE

Live700 Software Inc. | Software Developer / Web Developer | December 2024 – 2026

- Maintained and updated mobile game projects using JavaScript and Cocos Creator 2.4.12.
- Migrated game projects from Cocos Creator 2.4.12 to Cocos Creator 3.8.7 using TypeScript.
- Used Python scripts to support APK release workflows and configured Android Studio environment variables.
- Supported front-end web development tasks using React.js, Node.js, JavaScript, HTML5, CSS, and ES6.
- Integrated third-party APIs with application APIs using C# and ASP.NET Core MVC; exposed endpoints through Swagger/OpenAPI so developers could review documentation, test endpoints, and validate responses.
- Used GitLab, SourceTree, and TortoiseSVN for source control and project collaboration.

Infinite Evolution Technology Incorporation | Software Developer (Front-End and Back-End) | April 2022 – August 2023

- Developed front-end features for mobile games using Lua and Cocos2d-x/Cocos Studio.
- Developed server-side game APIs and application logic to provide accurate responses and data for other developers.
- Integrated third-party games through APIs and supported API testing using Postman.
- Worked with Erlang, MongoDB, Redis Desktop Manager, Navicat Premium, and PowerShell.
- Used GitLab and SourceTree to manage source code and version control.

Red Manta (Roblox) | Game Developer (Front-End) and Discord Bot Developer | 2016 – 2020

- Developed game functionality and scripts in Roblox Studio using Lua.
- Integrated Discord Webhooks with Roblox functionality.
- Developed Discord bot functionality using Python, including automated commands and event-driven features.
- Integrated a ChatGPT-style conversational feature into the Discord bot using the OpenAI API key.
- Used GitHub for repository management and Hostinger VPS for hosting.

EDUCATION

Bachelor of Science in Information Technology, Major in Digital Arts
S.T.I. Academic Center Lucena, Lucena City

Consumer Electronics Services NC II
Quezon National Agriculture School, Malicboy, Pagbilao, Quezon

ADDITIONAL SKILLS

Android Studio; Eclipse; photo and video editing; Adobe Illustrator; Adobe Premiere; Adobe Photoshop; 2D and 3D animation.
